Outcome Assessment In Advanced Practice Nursing: Third Edition

Synopsis

Awarded first place in the 2013 AJN Book of the Year Awards in the Advanced Practice Nursing category Named a Doody's Core Title This is an excellent and timely tool for advanced practice nurses." Score: 100, 5 stars -Doody's Medical Reviews Measuring the results of APN care has become increasingly important as a way to demonstrate the significant impact of APN nurses on practice outcomes. The third edition of this award-winning volume has been updated to provide the most current knowledge, perspectives, and research on assessing outcomes of APN care. It addresses not only the health outcomes of APN practice but the economic impact of APN care as well. Chapters discuss outcome measurement in all areas of advance practice nursing, including identifying outcomes in specialty areas and in community and ambulatory settings. The text provides detailed descriptions of how to conduct outcomes assessments, how to locate the most current instruments and measures for APN assessment, and perspectives on international initiatives in APN assessment. Examples of outcomes studies at the DNP level are culled from the most current published projects. Written by expert practitioners, educators, and researchers in APN outcomes assessment, this book will provide the essential information to help all APNs-regardless of specialty area or practice setting-to increase their skill level in designing outcomes-focused clinical research, selecting instruments, and analyzing outcomes data as critical components of their professional practice role. The third edition is completely updated and expanded to include: A new chapter on assessing outcomes at the DNP level through data gained from the most current research An expanded literature review on outcomes measurement research Guidelines for selecting assessment instruments Perspectives on an international initiative for the development of an APN research data collection toolkit New chapter objectives and critical discussion questions Updated web links

Customer Reviews

Everyone knows salaries for staff nurses are bundled into the costs for the overall hospital stay, but who pays for the Clinical Nurse Specialist salary? Well, good Clinical Nurse Specialists know how to leverage clinical practice improvements, educate and retain staff, and achieve cost recoupments to more than earn their pay---and that's because they read the examples and use the information presented in this book. Do you need to know how to perform a product comparison? This book summarizes the differences among the various types of economic evaluations so decision makers have the information they need to provide quality care and products for the front-level staff. Want to know how nurse-sensitive indicators affect the bottom line? One of the chapters discusses how to approach this. Need help with outcomes assessments? What about developing a monthly report to deliver to your boss to demonstrate your utility and value? This is all in the book. The book is also divided into specialty chapters for Cardiovascular Nurse Practitioner, Ambulatory Nurse Practitioner, Nurse-Midwifery Practice, Nurse Anesthesia, and the Doctor of Nursing Practice. I'm not really sure why these specialties were chosen over other specialties. It would be good to read about outcome measures and advice from expert Nurse Practitioners or Clinical Nurse Specialists in Emergency/Trauma, Orthopaedics, and Periop. But, I guess that's why we have to join our respective specialty organizations and be active on the listservs. I borrowed this book from our medical library and I'm fortunate that I don't accrue fines. The librarian knows I have it on my desk and I'll hand it back when someone else requests it or I leave the organization! In any case, if you're not generating RVUs, then this book will help justify your position and the value you bring to the organization.

Very well written book. Wonderful resource for any actively practice advanced practice nurse looking for assistance with demonstrating outcomes. Highly recommend.

Excellent resource for Doctoral program. Up to date information. Good guidelines for selecting assessment instruments and in measuring the results of APN care.

Excellent!! Easy read!

Excellent book!

for school
