When I was in my early teens, I took an advanced origami course at the adult night school offered by a local college. We used what was, at the time, considered standard origami paper, perfectly square pieces colored on one side with a nice smooth hand, but not glossy. I enjoyed it then, but haven't really thought much about it since, until I saw this book while browsing at my favorite Marketplace. I think what intrigued me the most was the question of how the author would present her instructions, followed closely by the question of whether the designs would actually work. Could I honestly accomplish designs as featured on the cover, a complex bow, just by reading a manual? I suppose I could have just taken a Look Inside, since features that function for this title, but I didn't. I just went for it, probably because of the reasonable price. I am so glad that I bought this book!

Sometimes it's the little things in life that have the most potential to be uplifting. To me, surprising the other members of my family with the design from the cover of this book is just one of those little things that has brought a few giggles and a little extra joy to the day. Today I made my very first (ever) fancy on-the-roll toilet paper origami design from the book. I chose the cover picture, the fancy bow that resembles the type usually made of ribbon and used to adorn little girls' locks or a fabulously wrapped gift. The instructions were simple, easy to follow, and worked well to allow me to create a design identical to the one pictured. And, I got it right on the first try, despite a bit of initial skepticism.
