Average Customer Review: 4.6 out of 5 stars Â Â See all reviews Â (87 customer reviews)

Best Sellers Rank: #466,710 in Books (See Top 100 in Books) #86 in Â Books > Business & Money > International > Exports & Imports

Customer Reviews

The reviews really alarmed me. It's something I believe should keep a close eye out on. Many people have high hopes for a book based on the reviews, but when the majority of the reviews are posted by a paid troll (in my opinion) then it puts the reader at a disadvantage because not only is it money wasted, but more importantly time. For example, just go to Kristen Durson's review (unless her review suddenly vanished) and note that every review I have read of hers has had the exact same text, only substituting the author's work in the necessary slots. The book itself? Private label of course a good idea, nothing new here. You could find a niche, source from alibaba, and send it

directly to FBA.

Lots of great info here. Specific and not fluff. Actionable stuff. Recommend it definitely. This is lots better than two other books on the same topic that I bought at the same time for the same price.

None of these books really tell you how to find that product and without that it's not gonna happen.

This book opened my mind to all the possibilities for making extra cash out there. Had no clue about private label businesses, but now I see how to relatively easily set one up and start making cash. Have already talked to some suppliers and will hopefully have a product out in the next month or two. Thanks!

While other FBA ebooks are just worthless....this one actually has some meat and I learnt a few things that i expected from other ebooks but never got it ...may be because the author was just trying to sell the book and not give me anything in return.If you are into FBA and private labelling ...read this book

I made my first fortune with private label (out of my home) before ever even knew what it was called... that was WAY BEFORE ,ebay etc... these days profits come SO MUCH QUICKER.... private label is no joke. its a great way to effectively create your own market and dominate it!

This book may be seen as short by some, but it's just what anybody needs who is thinking about private label selling on . While I've seen the majority of this information elsewhere, I recommend it to beginners new the process and it's a good first step to learning.

I have been selling used books on for several years and recently took an interest in FBA. I have read ten books on the subject--Private Label Empire was far and away the best. The author is clear, specific and smart, and he lays it out step by step. This is an excellent book. If you are interested in FBA, this is the book to read. I have it on Kindle and plan to order a bound copy so I can write in the margins.
