This book proved to be a very valuable resource of valid and accurate information pertaining to surf spots I have visited last summer in Europe. I surfed northern Denmark and Germany, and even though these are not very common surf spots, the book had information about spots, and it was a great help. This book not only attempts to provide information on the surf-quality of the particular spot, it also gives a little bit of insight in the surf culture of the area and other information and tips that might not seem obvious at first glance but does prove to be very interesting and worth reading. Unlike a travel agent's brochure it is very unbiased and allows surfers to travel "their way". In planning my surf trip to France next summer, this book gave me a place for reference and also allowed me to "float" around in it, checking out this spot or another. The thousands of photographs give the spots a face, making the book not only informational but also very entertaining to read. It lets the reader dream of a perfect vacation and then proves a very valuable tool to realize that dream and turn it into a reality.

This is the most awesome book on surfing Europe imaginable, covering all the best spots (and then some) from Scotland to Italy, from the Azores to Germany, and everywhere in between! Surf in Amsterdam? You betcha! It also includes Morocco. It is full of incredibly professional high-tech,

accurate maps, pictures, write-ups, and gauges a variety of conditions for each spot- such as water temp, crowd factor, quality of wave, direction wave breaks, power of wave, ocean (break) bottom, what sort of rubber you'll need, etc. Since you'll notice that is often out of stock on this, or that it takes '3-5- weeks for delivery', I recommend surfing to .com's UK site (.com.uk) and ordering directly from them in England- you'll pay a little more for shipping, but they usually have it in stock and you'll be sure to get your copy sooner. This is the Surf Bible of Europe!

I really dig checking out all these surf spots and thinking someday I might use the loads of information they provide to score a good session.

You will find anything in here but limited to Europe... : waves theory, advices, spots with maps and directions, meteo. Most of spots can be visited and the surfing possibilities that are described in here will be enough to fill anyone's surfing life!
