A New Approach To Stock Trading: The Guide To Success And Economic Empowerment

Synopsis

NOW IT'S TIME TO CHANGE YOUR LIFE! Are you tired of not moving ahead? Now is the time to make the decision to change. Let me teach you how to break the routine, work less, enjoy the good life you deserve, and become financially independent. I'll teach you, step-by-step, to become a trader, skilled at creating an ongoing income from the buying and selling of stocks over one trading day or several days or weeks. I'll share the secrets of traders that have done it before. This is a profession that made me wealthy in just a few years. **THE MARKET WHISPERER** is an essential guide to stock trading. It is ideal for those with no background or experience, as well as for experienced investors who lack sufficient skills for active stock trading. It will guide you towards becoming financially independent and put you in control of your own destiny. Topics include: • Fundamentals of trading • Choosing the right broker and trading platform • How to choose winning stocks • How to profit from rising or falling markets • Technical analysis • Basic and advanced trading methods • Financial and risk management • Trading psychology • Self-empowerment Don't delay! Now is your time to make the move of a lifetime! Meir Barak is a professional trader and CEO of Tradenet, an internationally-renowned trading school which he established in 2004. Prior to becoming an independent trader, Meir was an entrepreneur for several startups in the field of communications and IT. Tradenet has now become one of the largest trader training schools in the world, featuring branches in many countries and over 30,000 students who have enjoyed and benefitted from its rich information and knowledge. Meir Barak is a frequent television guest expert on financial affairs and market analysis. He is also a much sought-after lecturer in the field of trading and self-empowerment. Meir is married with three daughters. He divides his time between independent trading from his home and lecturing internationally.

Customer Reviews

I have recently finished reading *The Market Whisperer* and am now reading it again as there is a lot of valuable information in here which cannot be fully absorbed the first time around. It bothers me that the most helpful review of this book is written by a person who completely misunderstood the intended audience of this book. He calls the book "terrible" and recommends instead Jesse Stine or Mark Minervini. The thing is those authors are writing very different types of books than this author Mr. Barak. In *The Market Whisperer*, Mr. Barak tells us briefly his life story, how he became a successful day trader and takes the reader step-by-step into the world of day trading - a practical guide of how to do it. The negative reviewer did not like the background that forms the first part of the book but I found this very interesting and if one is going to buy or sell stocks it does not hurt to know the basics and history instead of living in ignorance (for example what the difference is between the S&P 500 and the Nasdaq). The reviewer also did not appreciate the explanations of trading strategy and indicators. However the intended audience is likely not familiar with these strategies and indicators and therefore are important to know. I particularly liked the emphasis in the book on the 'psychology' of the market (understanding why price is going up or down - human emotions relating to fear and greed and how to take advantage of other traders panic) and the last part of the book about the psychology of trading - how to overcome mental obstacles, stick with it and succeed.

I have never written a review for a book on because none of them were any good (I only buy trading books here). I followed Meir on his youtube videos making live trades, and checked his performance on the tradenet website for about 2 months. I've always been skeptical of people claiming to be a great trader and offering services as well as writing books about their experience. After mulling over whether I should take his course or not, I e-mailed him and was surprised he replied back! After answering some of my questions, he recommended that I read his

book. It's safe to say this book is like none of the other ones I read, like Al Brooks (too cryptic) or pattern books that offer no fundamental explanation of how the whole system works. Meir's book is very straight to the point and explains every detail of what a short-term trader should know...after watching the market for two years and failing, this book told me why I was failing for the entire two years. I highly recommend this book as the top trading book I've come across. He's not some white collar jerk-off explaining to you as if he were talking to you as a child, how a stock should behave and how a company's value is related to the fluffy idea of an investment. I remember walking into my finance 100 class at Wharton and asking the professor why anyone would ever buy a stock, which is essentially a piece of worthless paper, since the ownership I would have of a company is less than 0.1%. He openly laughed with the class at me explaining how stupid I was and how the discounted cash flow, the Gordon growth model and the capital markets worked. I took that class for a semester and it still didn't answer my question.
