Customer Reviews

Mark is a generous soul, a great writer and someone who is willing to patiently stand by as you learn to do it yourself. He taught me how to upgrade my espresso machine, and he will teach you to make a stripper deck. The magic of this technique is that building a trick instead of buying one is,

pardon the phrase, magical. The anticipation is half the joy. Have fun.

I was already a fan of Mark Frauenfelder from his work for the always-entertaining BOING BOING website and WIRED magazine, so I bought this book more out of curiosity about what fresh insights he might bring to an old area of magic than in order to learn any magic tricks. Once I had read it, I was surprised by several things. First, I was amazed that at age 65 I didn't know that many of the coolest card tricks done by famous magicians (including mind-bogglers like David Blaine) were made possible by small and fairly simple alterations in the cards. The second revelation was how much fun it is to perform the card tricks Frauenfelder explains in the book. When I show them to my wife and friends, they naturally assume the decks are tricked out somehow, since they know I've never been into doing magic. But unless I explain, they usually have no idea how I do the tricks. Either way, each trick is good for both praise and laughs. My third revelation was how true Frauenfelder's major rule of performing the tricks is: "Practice a lot." It takes time to learn to be smooth at shuffling, at being able to spot or feel the small differences in the cards, and to arrange and rearrange them properly to make the tricks work. One thing I was not surprised at was how well written this book is. Frauenfelder has always been an extremely good writer with a knack for explaining things. His directions for making the trick decks and performing the tricks are all very clear and understandable. The full color illustrations and photos in the book are also excellent. If you have any interest in magic and card tricks, or if you're a fan of Mark Frauenfelder, you'll want this book.

Frauenfelder's books is a great how-to guide to making the most useful decks and cards in magic. He includes concise directions, alternative versions and killer presentations that will stun your audiences. These effects are among the most powerful ones you can perform without years of practice. With a little fun handiwork and some practice, you'll be performing miracles and possibly well on your way to inventing your own.

Mark Frauenfelder has pulled off yet another slick trick: curating some really clever card tricks into a terrific DIY book. I've had great fun with a stripper deck and I'm eager to make the other decks. The first rule of magic is never "give away" your tricks, but Mark has generously shared (for a very small fee!) some big secrets of how you can hack card decks for hours of fun!

The info in this book is adequate to explain how to make a few good trick decks pretty easily, but the

companion website has expired (at least as of April 18, 2016), and several of the illustrations in the second half of the book are missing.

Very straightforward instructions on how to set up your own trick decks. It's worth purchase just for the two most impressive tricks, the Brainwave Deck and the Invisible Deck.

Good book worthy of four stars. I knew them all though. Every good magician is probably familiar with these tricks.
