Yellowstone And Grand Teton National Parks [Map Pack Bundle] (National Geographic Trails Illustrated Map)

Synopsis

â ¢ Waterproof â ¢ Tear-Resistant â ¢ Travel Map Yellowstone National Park was the world's first national park and covers 3,500 square miles. Just to the south of Yellowstone, are the jagged peaks of Grand Teton National Park. The Map Pack Bundle includes maps of both of these iconic parks. Each park has its own character with Yellowstone's mighty falls, massive lake and dramatic geisers. Not to be overlooked, the Teton Range of Grand Teton National Park juts almost vertically from Jackson Lake. The two maps in the Map Pack cover the many thousands of square miles and show popular tourist destinations as well as the deep backcountry where only the hardcore backpacker will be seen. The maps include detailed trail networks with points of interest such as campgrounds, boat ramps, ski areas, and many more. Buy the Map Pack and save 15%! The Yellowstone and Grand Teton National Parks Map Pack includes: Map 201 :: Yellowstone National Park Map 202 :: Grand Teton National Park Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation. Map Scale = 1:126,720 & 1:80,000 Sheet Size = 37.75" x 25" Folded Size = 4.25" x 9.25"

Customer Reviews

I purchased this map set for our up and coming trip to Yellowstone and the Tetons. The first thing I want to say is that the map for Yellowstone is NOT the real detailed one like the Teton one is. I was not aware of this at the time of purchase. The maps included are 201 (Yellowstone) and 202 (Grand Teton). National geographic also offers Yellowstone maps for the Southwest region (302),

Northwest (303), Northeast (304) and Southeast (305) in a more detailed version. That said the 201 map is still really nice it may not be as easy to read for shorter hiking trails. It is a really big park so it requires having 4 separate maps for more detail. The map is made out of a really nice material or it has a coating on it that makes it waterproof and still nice pliable. If you're planning to write on it I would suggest a sharpie and a highlighter doesn't seem to stick to it. I would also recommend to get the National Geographic guide books to go with it. I got a different brand so the trail numbers don't match up. Once I get back I'll update on how well they worked.

I ordered these maps to help with trip planning.
PROS: Two pack, so you get a little price break
Made of tougher water resistant paper, so they are stronger than a paper map
Have some trails and mileages listed
Show different features of the park
CONS: None at this time

This map pack contains the Grand Teton map and the Yellowstone map. The Grand Teton map has one side with a map of the whole park in somewhat less detail, and on the other side a more detailed map of only part of the park. The Yellowstone map has about half the park on one side and the other ~half on the other side. Map material is of the highest quality I have seen so far. One disadvantage we have encountered is that backcountry camping sites in the Grand Teton map are marked very vaguely/inaccurately. Backcountry camping in the Tetons is allowed in regions highlighted in pink on the map and marked by signs on the trail at the beginning and end of the allowed region. Each region can be several miles long. However, in many cases the vast majority of that region is practically impossible to camp in, and actual campsites are usually signposted. In addition to the pink color of each camping region, each region on the map also includes one or two campsites that are specifically marked by a tent inside the pink region. However, in many cases there is no correlation between the tent mark on the map and the camping sites in reality. Considering that each region is often several miles long, that makes it very hard to plan walking distances and times to camp. It would be best if map editors either removed these tent marks altogether, or, ideally, mark on the map the true locations of actual camping sites in correlation to their location on ground. Otherwise these are high quality maps.

Pretty good maps, they helped us during our vacation. They were good for us to plan our basic vacation before leaving. Once in the area we found much better maps for trails and landmarks. Printed on pretty tough paper and felt like quality.

Ordered these maps before our upcoming trip to Yellowstone and Grand Tetons, as I am a planner. These have a plastic coating making it possible to place stickers for stops I want to make, different colors for scenery or wildlife.

Grand Teton map without mileage - how is that useful at all. Also the main tourist sights aren't really marked either (no names). Use this instead if you want to backpack or for anything really. Grand Teton National Park Hiking Map

The Yellowstone map I received is excellent, and just what I was looking for. However, the "Map Pack" package did not contain a Grand Teton map -- it contained a Rocky Mtn Park map instead, so I would not recommend ordering this map pack product.

I loved the quality of these maps and used them in planning my trip. But when it came time for using them in the car, they were just too big. I ended up using the free one they gave out at the entrance of the park. I recommend getting these maps because they are very detailed and good quality. They won't get ruined easily. But they are large.
