Human Histology: With STUDENT CONSULT Online Access, 3e (Human Histology (Stevens))

Synopsis

The 3rd Edition of this well-established textbook continues to present human histology's need-to-know content in an exceptionally user-friendly, well-designed, full-color layout. Thoroughly revised and updated, it incorporates all of the latest information on molecular biology and histological investigations. Clearer, larger images make it easier for readers to recognize microscopic structures. Clinical scenarios in each chapter link the basic science to clinical practice, making histology highly accessible and relevant. The smart way to study! Elsevier titles with STUDENT CONSULT will help you master difficult concepts and study more efficiently in print and online! Perform rapid searches. Integrate bonus content from other disciplines. Download text to your handheld device. And a lot more. Each STUDENT CONSULT title comes with full text online, a unique image library, case studies, USMLE style questions, and online note-taking to enhance your learning experience. Uses an easy-to-read writing style and well-designed, full-color layout to present all histology's need-to-know content. Features over 870 clear, full-color illustrations, electromicrographs, and photomicrographs highlighting histological concepts and recognition of microscopic structures. Sets off the key laboratory, clinical, and high-level scientific material in boxes for easier access. Your purchase of this book entitles you to access www.studentconsult.com at no extra charge. This innovative web site offers you... Access to the complete text and illustrations of this book. Integration links to bonus content in other STUDENT CONSULT titles. Content clipping for your handheld. An interactive community center with a wealth of additional resources.

Book Information

Series: Human Histology (Stevens)

Paperback: 464 pages

Publisher: Mosby; 3 edition (November 24, 2004)

Language: English

ISBN-10: 0323036635

ISBN-13: 978-0323036634

Product Dimensions: 11 x 8.5 x 0.9 inches

Customer Reviews

I bought this recommended book for my Histology class at the University of Copenhagen. At first it was fun to read the authors' dedication of the book to different winemakers, but eventually I grew tired of the endless joking around. The actual core text is not very in-depth but the illustrations are beautiful, thus the mediocre rating. And another thing, the book is useless when it comes to the central nervous system.

Just for using human tissues this book is wonderful. Enough for monkey, pig, rat or horse tissues. Besides, the proposal of discarding the old classification of tissues and instead use now an cellular approach is very appropriate. And above all clear and precise descriptions. This book would be better with more molecular details, and more information in morphology; but it outstands many other books in the field.

I'm a med student and found this text right enjoyable and an alternative easier to text to learning histology. The pictures are quite detailed, which is important especially for histology lab exams. The organ systems are explained in a clear matter without extremely hard vocabulary to understand. This text does what it is supposed to do, which is to teach. I also found the Histology Study Guide: Key Review Questions and Answers ISBN: 0971999686 very good in helping me prepare for my medical exams in histology class. I highly recommend both books.

I think this book is one of the best in the market. The information is straight forward and easy to read. Everything in this book is very well organised.

This may seem quite strange but it is true. Reading this book i was totally terrified that histology could be a difficult and demanding task to deal with. But to my own surprise, i surpassed this obstacle with the help of another totally unknown book called " Basic Histology" by Adonis Kalligaropoulos. I recommend it to you if you want to acquire a clear and simple idea of histology and take an A in your exams.
