Customer Reviews

This text is horrible. The print quality is very cheap - it is basically printed on copy paper. The text has glaring grammar errors and missing words. Entire paragraphs are reprinted. Words are misspelled or simply omitted. The absolute worst textbook editing I have ever seen. It's as if no one ever read the thing. There are errors on nearly every page. Ridiculous.

This book is one of the worst nursing books I've seen yet. It is so strewn with grammar and editing errors it's hard to read. The information in every chapter is excessively redundant. Essentially, the same ideas are repeated chapter after chapter under the guise of different topics. This book could have easily been half the length and it may have been productive. But, as it's written it is simply busy work for already busy nursing students. Don't waste your time.

I couldn't believe that there were so many grammatical errors in this book! It is an instructional book for God's sake. So disappointed that all this was overlooked just to make a quick buck and still so disappointed that any school would choose it and thus have people like me have no choice but to buy it.

I really like the way that it is written and laid out. Don't really care for some of the EBP notes, but all-in-all, it's very easy to understand and I actually enjoy reading it for school.

Book was very informative and very helpful in understanding the course material. Chapters were very explicit and easy to understand.
