Customer Reviews

Boy, I can't believe that there are 3 1* reviews for this ultrasound 'gold standard' of textbooks; 2 of those commenting complained about the service without even discussing (or never having seen the

text!); the other 1* review was useless. Now, I'm an academic abdominal radiologist who does interpret ultrasound examinations; the 2-volume text provides the most comprehensive coverage available in one place, i.e. a tome w/ two books; I've owned two editions of this text and will purchase the next one when released - an essential part of any library for those involved with ultrasound procedures.

This book has surpassed all my expectations. US pictures are excellent and it has everything and more. It is more than a complete text for reference for sonographers. It also talks about patient preparation and scanning techniques. After buying almost every ultrasound book out there, I finally found the book that has all the answers I was looking for. Save your money from buying other books. This is "IT". If there is a "wow" rating, I would give it to this one.

This is the bible for a sonographer!!!! If you aren't familiar with ultrasound/medical books, this isn't a very good 'learning' book. I do think every clinic site should have a set of these available though!

It cover almost everythings you need in Ultrasound practise, great reference guide for those people who have just start thier Ultrasound practise. Moreover, those information in the book are with up to date Ultrasound technology. All in all, great book and worth the money that I spend !!!!!

these book were used condition, but still in very good shape!! especially for the money, i would definitely buy them all over again! thanks for the great product

did not receive the item, just an email stating that the order was cancelled and monies would be returned to my account as the item was incorrectly priced! unreliable! bet it wouldn't be that easy if i was the one that decided the book was too expensive after the sale had already gone through...

I ordered these books online on May 21st and still have not recieved them (It is June 22nd). I wrote the company asking for what is going on and they still have not written me back. I start school soon and I don't know if Im even going to have my books!
