DeVita, Hellman, And Rosenberg's Cancer: Principles & Practice Of Oncology (Cancer: Principles & Practice (DeVita)(2 Volume Set)

Synopsis

Acclaimed by the worldwide medical community as "a staple reference text in the medical oncologist's library" (JAMA), DeVita, Hellman, and Rosenberg's *Cancer: Principles and Practice of Oncology* is now in its Eighth Edition. This edition is in full color for the first time, has a new editor, Theodore S. Lawrence, MD, PhD, a radiation oncologist, and has two Associate Scientific Advisors, Ronald A. DePinho, MD and Robert A. Weinberg, PhD, with special expertise in molecular biology. More than 40 chapters are entirely new, and more than 70 have been rewritten by new contributing authors. Plus, this edition has an exciting new companion Website. The text provides cutting-edge, practical information on the science of oncology and the multimodality treatment of every cancer type. To ensure a balanced, multidisciplinary approach, each major treatment chapter is co-authored by a surgeon, a medical oncologist, and a radiation oncologist. Treatment of each cancer type is discussed by stage, with coordinated guidelines on the role of each treatment modality at each stage. Each major treatment section is preceded by an updated brief chapter describing the molecular biology of the cancer and the implications of molecular biology for patient management. Full consideration is also given to cancer prevention, screening, palliative care, supportive oncology, and quality of life issues. A companion Website offers the fully searchable online text, an image bank, links to journal articles, and a question bank.

Book Information

Hardcover: 3200 pages

Publisher: LWW; Eighth edition (April 22, 2008)

Language: English

ISBN-10: 0781772079

ISBN-13: 978-0781772075

Product Dimensions: 12 x 9.5 x 5.5 inches

Shipping Weight: 19 pounds

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (4 customer reviews)

Best Sellers Rank: #697,933 in Books (See Top 100 in Books) #58 in [Books > Textbooks > Medicine & Health Sciences > Nursing > Clinical > Oncology](#) #88 in [Books > Medical Books > Nursing > Oncology](#) #92 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Hematology](#)

Customer Reviews

Without a doubt, this book is the leader in cancer literature. It has over 3,000 pages and weighs over

18 pounds in two volumes. It is the publishers, Wolters Kluwer/Lippincott Williams & Wilkins, who deserve the credit for creating this massive work. There are 421 contributing authors, but the publishers organized this enormous amount of material by the scientific leaders in the oncology community. The publishers have included cartoons that visually explain some of the intricate mechanisms of cancer development and treatment that help the reader understand how cancer develops and the treatments involved. The reader will understand the hidden role of the publishers when difficult and obscure treatments and strategies are clearly explained. If the reader follows the cancer literature, as I do in cancer journals, the reader will appreciate the editors' role in presenting clear, understandable reading. The reader should be under no illusions that the 421 authors are gifted writers as they are physicians. There are 78 chapters containing all the current treatments and strategies for the treatment of cancer but obviously the latest treatments and drugs could not be included. The 9th edition, currently released in 2011, will undoubtedly, will correct this situation. Whether it is the molecular basis of cancer, or the principles of oncology, or the practice of oncology, or the newer approaches in cancer treatment, this is the source book all health professionals who need, and read more than superficial journal literature. This is the ultimate, indispensable source for those who study cancer.

It is old version. but I am one of the contributors of this textbook. I recommend this book. I got this in good price.

Look, this is the reference book for cancer. They get the best thought leaders, write the best summaries, and have the most comprehensive guide out there - plus free access via web (very handy if you don't want to lug a 30 lb. book with you on rounds!). Pick up a new one every 2-3 years so ASCO, ASH and SABCS Updates are covered.

Exactly as described, excellent service.
