- Reviews Worth Noting:"[As] stocks have surged and bond yields have dwindled, investors increasingly ask "Why bother with bonds?" Rick Van Ness takes this question and runs with it in his book sporting this provocative title. Sooner or later, this question will answer itself, and it will behoove all investors to get to know Rick before it does. Read it, enjoy it, and profit from it--before it's too late."
- William J. Bernstein
- Author, The Four Pillars of Investing
- "In his simply stated and entertaining book, Rick Van Ness eloquently instructs the reader on how to do bonds right - in fact, better than any single book I've read."

Customer Reviews

I was able to download this book for free in Kindle when it went on sale last week. I gave it four stars because most of the beginners in investing WILL benefit from it. Note that I used WILL instead of CAN. There are certain simple things that most investors ignore and this book shines light on them. For example, How impactful is a 1% management fee? Rising interest rates is not end of the world for those who want to invest in bonds. Bonds play a vital role in your behavior in addition to providing a ballast for your portfolio. Keeping it simple makes you stick with a plan. However, I would give this only three stars if you are an advanced investor. Some of the complaints I have on this book are as follows: 1. This book should have spent some time discussing IBonds rather than a simple reference to Bogleheads Wiki. 2. I found the reference to Norstad.org article on how risk in

stocks increases with time (rather than the popular belief of risk reduces with time) fascinating and highly misleading. The article and the book seem to conveniently ignore practical facts on how an investor accumulates wealth and consider theoretical assumptions that are not realistic to prove a point.a)For example, the book concludes that there is a 10% chance that a stock portfolio will under perform a savings account with 6% interest over 40 years. The authors conveniently ignore the fact that whether there is a savings instrument that pays 6% and reinvests at 6% fir a 40 year period(Zero coupon bond for 40 years with an interest rate for 6%). I do not know any CD's available for 40 years.
