Your Baby In Pictures: The New Parents' Guide To Photographing Your Baby's First Year

Synopsis

Capture the story of your baby's first year! The first twelve months of your child's life are full of precious, fleeting moments, from sleepy newborn yawns to first smiles and wobbly first steps. Why entrust your memories to hastily taken snapshots or worse yet, none at all? Let professional photographer (and mom) Me Ra Koh help you capture the moments with 40 beautiful photo recipes anyone can do, with any camera. Telling your baby's story in pictures has never been easier!

Customer Reviews

I discovered Me Ra Koh a few years ago when I ordered her DVDs "Refuse to Say Cheese" and "Beyond the Green Box". I found that I loved her warm, informal style and was greatly encouraged to re-learn what I'd known about real photography. How wonderful to find that her book has the same Me Ra character--a friendly, down-to-earth friend who comes alongside you and shows you what she's doing with her camera to capture a certain sense. I grieve over the fact that I didn't have this knowledge when my own babies were new & squishy, since I was in such a sleep-deprived exhaustion that these "photo recipes" were what I needed. Me Ra provides clear explanations and cuts right through technical confusion to open up a whole new world of photographing memories. She explains why it is she's doing what she's doing, which creates continual "a-ha" moments that make learning a new hobby so approachable. What sets this apart from any other book out there is the loving treatment of all those unique baby moments from someone who has obviously been there

and cherished them: the fleeting hair swirl, baby feet, the love pats while feeding, inked-up baby feet at the hospital, .Babyhood, much to my sorrow, is all too fleeting, and I only wish I'd had this book sooner so that I could have had this knowledge while my own were still in the newborn phase. Without question, I am giving this as my favorite New Baby Gift.

I guess I'll just add my 5-star review to the pile. This book is so wonderful and helpful and came at the PERFECT time. I have one of those "fancy" cameras and not a lot of knowledge about it. I keep thinking I'll "learn one day" but keep it in its Auto mode 99% of the time. Well, at 39 weeks pregnant I decided that pictures of our first newborn were an absolute necessity but we couldn't afford to pay a photographer, so it was high time that I learn how to use that puppy! In her introduction, Me Ra Koh explains that when she bought her first big-girl camera, she felt lost and people who were "in the know" talked above her head or in terms that seemed like a foreign language. Hello, kindred spirits, sister! I have more than one pal who takes photographs professionally - a couple who are freakishly good and make a great living at it. But when they talk about their photos, it's like they're speaking Japanese. I grabbed a Cabbage Patch doll from my childhood and began experimenting with my camera the day I got this book. Little by little, chapter by chapter, Me Ra introduces you to quick tips and tricks to get great pictures - even in Auto mode. Then she gives you projects with "recipes" for a great photo - so I can take my camera out of Auto mode and set the aperture, ISO, and shutter speed for myself and get accustomed to what these settings change in each picture. I find myself taking more than one picture, changing settings with each one, and then comparing. I'm actually learning, and it's fun! I'm 39 weeks and 4 days and baby has still not made his entrance into the world.. but I've got some great pictures of my Cabbage Patch doll! This is THE book for new parents and/or people who are nervous about photography. It's YOUR family and YOUR baby. Have fun!

This is a great book for any new parent out there--the helpful information about how to take a photograph, how to use your camera as well as capture the moment is great. As a new mommy and a photographer also, I was encouraged to see my baby with new eyes all over again! Thank you MeRa for the great book! MeRa is fabulous throughout the book and in person--you won't be disappointed!

I bought this book based on the great reviews here, and the fact that my first child (daughter) is to be born in about a month. I greatly appreciate the author's writing style --- helpful, not

condescending, slightly humorous at times, personal, etc. I would consider myself an intermediate photographer: been shooting with DSLRs for a few years, have studied various books/manuals on digital photography, frequently post process using GIMP. While I didn't really learn anything new in this book concerning camera settings (ISO, shutter, aperture) I really appreciate it as a refresher course on some things. Overall my favorite part of the book (and the reason I bought it) is the great example shots. They serve as a great jumping off point for shots I hope to get with my newborn. I also really appreciate how the book is divided into months of life, making it a easy, logical read. At \$10 I highly recommend this book, and it even if you don't learn anything new from it it makes a wonderful coffee table book because who doesn't like great pictures of babies?!?!

I love love love this book! I am a family portrait photographer, but I have never been over the moon about my newborn photos. Now I am! If you are an advanced photographer you will get a ton of ideas for natural posing and things to do during the shoot. And if you are a beginner, this book, and everything else Me Ra Koh is the thing for you! Me Ra's style is simple great photos- and she gives you just enough technical information to get there. The photo recipes are so helpful to get you started. A great way to learn is to copy someone you admire, and the more you shoot the more your own style will emerge. Get started with newborns with this book!
