Its doing what I need it to do. Take it to class, reference it when I'm doing an assignment. Its actually a good read. It's not too boring allowing me to do my reading and understand what goes on with research

It is a good basic-research methods book, but with some sports-related examples. I highlight the chapter 6 (Dissemination of Findings) that is a chapter written specific for sports management publications.

This book was okay for the Masters course assignments. Sports management is a field that is ever changing so other sources were needed.

Very useful for my research.
